SECTION 1: INTRODUCTION

Kenya Film Classification Board is state-owned corporation under the Ministry of Information, Communications and Technology with information regulatory role. It is mandated by Films and Stage Plays Act Cap 222 Laws of Kenya to regulate the creation, broadcasting, possession, distribution and exhibition of films in the country. Section 46.1 (2) of the Kenya Communications (Amendment) Act, 2009 further expands the mandate of the Board to cover the broadcasting sub sector.

The main functions of the Board are to examine and classify films meant for public exhibition in order to conform to the national aspirations, moral standards and protect the children while allowing more choice for adults. The children are protected in the sense that the content intended for adult is not consumed by them and ideas or thoughts that may comprise public morality and decency are not released to the public through film.

When making a classification decision for a film, the Board takes careful consideration of the film’s content as well as all other relevant factors and concerns. The description of each of the classification categories and the indication of the suitable audience in terms of age may be found in these guidelines. To clarify the usage of words in the guidelines, a glossary of terms is included.

Supporting Legislations informing these guidelines include:
2. Films and Stage Plays Act Cap.222 amended through The Statute Law (Miscellaneous Amendment) Act, 2009
3. The Kenya Communications (Amendment) Act, 2008
4. The Kenya Communications (Broadcasting) regulations, 2009
5. The National Cohesion and Integration Act, 2008
6. The Alcoholic Drinks Control Act, 2010
7. The Sexual Offences Act, 2006
8. The Children Act Cap 586 Laws of Kenya

SECTION 2: PREAMBLE

People thoughts and ideas can be presented in different forms, either in a song, a book, a play or even a film. When these thoughts and ideas are presented in different avenues they cease to be just thoughts and ideas, they become a form of communication. Communication has consequences which can be either positive or negative.

Film being a medium of mass communication has the power to influence one’s choices and decisions hence the need to classify and examine film. This is to ensure that wrong, distorted and misleading information does not reach the public especially children and the youth who are vulnerable.

There are checks and balances in every industry; be it law profession, medicine, journalism, engineering and so forth. To ensure professional standards are maintained and public interest is safe guarded, the film industry is no exception.
